INTRODUCTION

This manual is intended to provide the information necessary to service the SUNringle Bubba / Super Bubba and Bubba X / Super Bubba X Hubs. We highly recommend installation be performed by a qualified mechanic. These instructions can be downloaded from the SUNringle website at www.hayesbicycle.com

⚠ WARNING ⚠

We highly recommend that service to this hub be performed by a certified bicycle mechanic. Failure to follow instructions presented in this manual could lead to serious injury or death. Any questions about the servicing of product or the manual itself should be directed to Hayes Customer Support at:

tools and materials

Below is a list of tools and materials necessary for Servicing Super Bubba hubs.

- Two pin spanner (Example: Part Tool SPA-2)
- 90 degree pick tool
- High quality bicycle grease
- Freehub Body grease (Dumonde Tech Freehub Body Grease recommended)
- Freehub Body oil (Dumonde Tech Freehub Body Oil recommended)
- Bearing puller OR hammer and punch
- Bearing press

Hub Disassembly

- 1 Remove the wheel from the frame, remove cassette and rotor. Remove the end caps by gently pulling them away from the hub.

- 2 Slide off the Freehub Body by gently pulling away from the hubshell. (If hard to remove lightly turn the Freehub Body counter clockwise it is pulled.)

- 3 Remove the crush tube.

Hub Disassembly

- 4** Remove axle by sliding it out of the hub. Axle can be removed out of either side of the hub shell.

- 5** Remove lock ring with pin spacer. The lock ring is left hand thread.

Note: if you are having a hard time removing the lock ring attach two disk screws in the hub 180 degrees from each other, use these to hold the hub in a vise.

- 6** Using the 90 Degree pick tool pry out the top ratchet ring.
NOTE: Bubba X and Super Bubba X only use one ratchet ring.

Hub Disassembly

- 7** Remove the bottom ratchet ring as well with the pick tool.

Free Hub Disassembly

- 1 Remove the first set of Pawls and springs, three of each, they will slide out by hand. **Note: Bubba X and Super Bubba X have one row of 6 pawls**

- 2 Remove the pawl split ring with the pick tool. **Note: Bubba X and Super Bubba X do not use a split ring.**

- 3 Slide out the second set of Pawls and springs.

Free Hub Disassembly

4

Remove the seal from the drive side of the Free hub body.

bearing Removal

- 1 Pull out the non-drive side (NDS) bearing from the hub, behind this bearing is a spacer.

- 2 Pull out the drive side bearing.

- 3 Pull out the inner bearing on the freehub body, behind this bearing is a spacer.

- 4 Pull out the outer bearing on the freehub body.

bearing Installation

- 1 Lightly grease the new bearing with high quality bicycle grease. Press in bearing into the Non-drive side (NDS) of the Hub.

- 2 Install the spacer, lightly grease and press in the driver side (DS) bearing.

- 3 Lightly grease and press in the drive side (DS) bearing on the freehub body.

- 4 Install the spacer, lightly grease and press in the none drive side (NDS) bearing.

Free Hub assembly

- 1 Lightly lubricate the pawl seats with Freehub Body grease. Install the lower set of springs and Pawls. **Note: Bubba X and Super Bubba X have one row of 6 pawls**

- 2 Install the Pawl split ring onto the free hub.

- 3 Install the upper set of springs and Pawls.

Free hub Assembly

4

Install the seal on the freehub body (note the lip must face out toward the cassette)

Note: the seal must sit in its groove without being twisted or you will experience a high drag)

Lubricate with pawls and springs with free hub Body grease for quieter operation and longer service life, use free hub oil for louder operation and improved low temperature operation.

Lightly lubricate seal with free hub oil.

Hub Rebuild

- 1 Lightly grease the outside of the ratchet ring with high quality bicycle grease. With the groove facing outward slide the first ratchet ring down into the hub, make sure you have the first lobe of the ratchet ring in the first notch of the hub. **NOTE: Bubba X and Super Bubba X only use one ratchet ring.**

- 2 For 8 degrees of engagement install the second ratchet ring, with the groove up, with the first lobe on the ratchet ring in the first notch of the hub.

- 3 For 4 degrees of engagement install the second ratchet ring, with the groove up, with the first lobe on the ratchet ring in the second notch of the hub.

Hub Rebuild

4

Reinstall the ratchet ring with the pin spanner tool.

5

Lightly grease the outside of the axle with a high quality bicycle grease. Slide the axle back into the hub.

6

Install the crush tube.

hub Rebuild

7

Install the Free Hub Body onto the axle.

8

Once the freehub body is resting on the hub, depress all three pawls of the first set and push down, this will allow the freehub to move into the hub up to the second set of pawls. If the freehub body is difficult to install, gently rotate counter clockwise as it is pushed into the hub shell. Repeat for the second set of pawls. **Note: Bubba X and Super Bubba X have one row of 6 pawls**

9

Repeat step 8 with the second set of Pawls. If the freehub body is difficult to install, gently rotate counter clockwise as it is pushed into the hub shell.

Hub Rebuild

- 10** Press the freehub body down fully making sure the seal does not get folded over.

- 11** Press the none drive side (NDS) end cap on, press till the cap touches the hub bearing, this sets the axle.

- 12** Press on the drive side (DS) endcap.

Bubba DH 6-Bolt Front Hub

	DESCRIPTION	PART #
